

SmartVend

Laundry

SmartKit Laundry can be installed in many laundry facilities.

The **SmartKit Laundry (SKL)** system allows Cash Card payment at each machine in a Multi-housing or Coin Laundry facility. Unlike most systems supporting custom or proprietary cards, every **SKL** card accepting device (CAD) is approved by **Mondex** and **VISACash** and enabled with a simple upgrade. **QI Systems'** system can be integrated into most modern commercial laundry machines.

Cash Card transactions are quick and simple for both customers and management. They offer major advantages over coin payment in many UPOS markets and dispense with the need for exact change and coin handling. This makes payments and accounting convenient, improves security and increases customer satisfaction, which creates a quality service environment.

Laundry facilities, particularly in multi-housing buildings, are vulnerable to damage by thieves attempting to access cash. This creates revenue loss and repair costs for machine operators and causes frustration and fear in tenants. Card payment can eliminate these problems and stimulate sales.

SmartKit Laundry: A Clean Investment

SKL is part of the **SmartKit®** family of modular cash card payment systems. Other devices that share the same payment module include vending machine kits and OEM kits for applications such as parking ticket dispensers. Using these **SmartKit** products, coin-free commercial laundry facilities are now possible.

SKL supports existing and future OEM top and front loading laundry machines, including the Maytag G1 and G2 and Alliance's V Series microprocessor machines and other coin-drop appliances. Depending on host machine support, **SKL** may be delivered with or without its own display or real-time clock in cost saving configurations. The **SKL** design makes installation simple, both in the field and on the factory floor.

Machine programming, sales and vend data upload and exception log handling are enabled by a handheld reporting device or merchant accumulator card. **SKL** may be bundled with either, pre-paid disposable, or reloadable cash cards for use with our card dispenser and reload stations. All system components support electronic audit.

QI supports custom packaging of card dispenser and revaluation systems to meet specialized requirements. Use of on-line credit and ATM accounts can make laundry facilities truly cash-less.

Features

SKL User Convenience

- ☑ **Fast**, easy payment.
- ☑ **Eliminates** correct change hassles.
- ☑ **Easier** to carry cards than coins.
- ☑ **Avoids** coin-jams and filled coin-acceptors, which render machines inoperable.
- ☑ **Creates** safe, quality service environment to draw and keep satisfied customers, increasing sales.

SKL Operator Benefits:

- ☑ **Eliminates** coin handling costs and duties.
- ☑ **Installs** easily, it can be added to laundry machines in as little as five minutes.
- ☑ **Removes** the need to replace coin-acceptors following vandalism and currency changes.
- ☑ **Adds** hourly pricing flexibility and loyalty program capability.
- ☑ **Increases Revenue** - customers don't overstuff machines due to coin shortage; small price increases made possible.

SKL Security

- ☑ **Accepts** only electronic cash, so there's no risk of funds being stolen. Can audit all components.
- ☑ **Reduces** the incentive for thieves and vandals to attack laundry machines through vandal resistant design.
- ☑ **Eliminates** the need for bill change machines, which are a prime target for thieves.
- ☑ **Ideal** for machines in apartment buildings and public laundromat facilities.

SKL Features and Options:	
✓	Conforms to VISACash and Mondex specifications. Will support emerging global cash card standards.
✓	Capable of accepting VISACash and Mondex cards along with proprietary card payment after a simple upgrade.
✓	Proprietary card support available for reloadable or in-expensive disposable cards.
✓	Replaces coin drop and coin slide payment systems with card payment at each laundry machine.
✓	In computerized machines, a full serial interface with the controller is supported. For older coin-drop type machines the standard pulsed interface is used.
✓	Physically and electrically compatible with most existing models of laundry equipment for OEM or retrofit installation.
✓	Tolerant of heat, humidity, vibration and electrical fluctuations.
✓	Electronic Journal stores data on 500 transactions: location #, machine #, card #, transaction type and value, date and time.
✓	Sales and vend data upload via <i>card port</i> and QLink ® handheld computer or merchant accumulator card.
✓	Card Dispenser with disposable cards or Card Re-load Station with re-loadable cards standard equipment.
✓	Custom packaging of card dispenser and revaluation systems to meet specialized requirements. Using on-line credit accounts eliminates cash on premises.
✓	QI Systems is a supporter of both the <i>Coin Laundry</i> and <i>Multi-housing Laundry Associations</i> .

SKL supports laundry machines such as:	
✓	<i>Maytag front and top load G1, G2 models</i>
✓	<i>Alliance front and top load V Series models</i>
✓	<i>Other coin-drop models.</i>
