

SmartVend

Cash Cards for Copiers & Printers

The **SmartKit Copier (SKC)** system allows Cash Card payment in a variety of Unattended Point of Sale markets (UPOS). Unlike most systems supporting custom or proprietary card systems, every **SKC** card accepting device (CAD) is **QI Card** ready, and is also **Mondex** and **VISACash** approved and enabled. **QI Systems'** smart card solution can be integrated into most modern commercial photocopiers and printers.

Cash Card transactions are quick and simple for both customers and management. They offer major advantages over coin payment and dispense with the need for exact change and coin handling. This makes payments and accounting convenient, improves security and increases customer satisfaction, which creates a quality service environment.

UPOS equipment, particularly in campus environments, is vulnerable to damage by thieves attempting to access cash. This creates revenue loss and repair costs for machine operators and causes frustration and fear in tenants. Card payment can eliminate these problems and stimulate sales.

SmartKit Console: A Secure Investment

SKC is part of the **SmartKit®** family of modular cash card payment systems. Other devices which share the same payment module include vending and laundry machine kits as well as OEM kits for applications such as payphones, water dispensing, parking ticket dispensers and Tool Crib management systems. Using these **SmartKit** products, coin-free UPOS environments are now possible.

SKC supports existing OEM photocopiers by Xerox and Kodak and printers by Hewlett Packard and Epson. Interfaces for other OEM equipment can be rapidly developed. Depending on host machine support, **SKC** can be installed at a cost-savings without its console housing in existing payment cabinets. The **SKC** design makes installation simple, both in the field and on the factory floor.

Machine sales and vend data upload and exception log handling are accessed by a handheld device or merchant accumulator card. **SKC** may be bundled with either, pre-paid disposable, or reloadable cash cards for use with our card dispenser and reload stations. All system components support electronic audit.

QI supports custom packaging of card dispenser and revaluation systems to meet specialized requirements. Use of on-line credit and ATM accounts can make facilities truly cashless.

Features

SKC User Convenience

- ☑ **Fast**, easy payment.
- ☑ **Eliminates** correct change hassles.
- ☑ **Easier** to carry cards than coins.
- ☑ **Avoids** coin-jams and filled coin-acceptors, which render equipment inoperable.
- ☑ **Creates** safe, quality service environment to draw and keep satisfied customers, increasing sales.

SKC Operator Benefits:

- ☑ **Eliminates** coin handling costs and duties or reduces these where coin operation is retained.
- ☑ **Installs** easily, it can be added to equipment in a matter of minutes.
- ☑ **Removes** the need to replace coin-acceptors following vandalism and currency changes.
- ☑ **Adds** pricing flexibility and loyalty program capability.
- ☑ **Increases Revenue** – minimizes lost usage due to coin shortage, small price increases made possible.

SKC Security

- ☑ **Accepts** only electronic cash, so there's no risk of funds being stolen. Can audit all components.
- ☑ **Reduces** the incentive for thieves and vandals to attack equipment through vandal resistant design.
- ☑ **Eliminates** the need for bill change machines, which are a prime target for thieves.
- ☑ **Ideal** for equipment in college and public library environments.

SKC Features and Options:	
✓	Accepts QI Card , VISACash and Mondex cards along with proprietary card payment, for both disposable and reloadable cards.
✓	Replaces or integrates with coin drop and coin slide payment systems with card payment at each machine.
✓	Physically and electrically compatible with most existing models of photocopy and printing equipment for OEM or retrofit installation.
✓	Tolerant of heat, humidity, vibration and electrical fluctuations.
✓	Sales and vend data upload via QLink® handheld computer or merchant accumulator card.
